- Dosing/filling
- Belt scales/conveyor scales

DESCRIPTION

The Model HBB is a single-ended bending beam load cell designed for multiple cell applications, such as low profile platform scales or small tank scales, when used with proper mounting accessories. It is insensitive to side load and capable of reversed loading.

The Model HBB is constructed of stainless steel or alloy steel. The strainless steel version is hermetically-sealed to IP68, providing excellent protection against corrosive and wash-down environments.
